NCC Reflection POS™ Embedded POS for Table Service Restaurants

Reflection POS Embedded is proven POS software with more than 20,000 systems installed in 35 countries around the world.

Reflection POS is equipped with the most sophisticated network on the market. System information is replicated on every terminal across the high-speed TCP/IP network.

Built on solid-state technology and an embedded operating system, Reflection POS is not susceptible to viruses or spyware so you can rest assured that Reflection POS will be ready to perform when you need it.

Why take a chance on anything else!

Payment Processing

Electronic payment sales can be processed in a single step with an optional integrated payment appliance. Free gift card processing is available through selected processing partners. NCC Reflection POS – validated by an independent Qualified Security Assessor to meet or exceed PCI requirements for card payment processing.

Back Office

PC Workstation, an optional component of a Reflection POS system, delivers reporting and management functions to a familiar Windows® back office computer. PC Workstation integrates seamlessly into a Reflection POS system and continuously communicates with the POS terminals to provide real-time reports.

Headquarters

Restaurant HQ provides centralized, web-based reporting and management tools to local, regional and national chains. Store data is automatically pushed to an FTP site and report information is available within minutes after the POS system is closed.
